SUMMER

SCHOOL

2023 SUMMER SCHOOL

Our summer school programme will be a month (04/01/2023 to 02/02/2023) long course that will assist students in getting a headstart. We will begin with basic topics and cover the critical topics in Mathematics and Physics. Students will have a minimum of 2 hours a day for a minimum of 2 days a week per subject. Each week will contain a minimum of one assessment to ensure that learners are prepared to get ahead.

Grade 12 are the pre-university years and we cannot stress enough how important it is that we try to assist students with as much exposure and practice as possible to ensure that they get the best results at the very end of their academic year.

STRUCTURE

A timetable will be given to each student, and the students will come daily at a designated time during the course of the week between 4 January 2023 to 2 February 2023. From 18 January 2023 to 2 February, students will attend on adjusted days and times as schools will have opened by then. We will make the timetable such that a student has multiple days to attend. Classes will have a maximum of 6 students to ensure that no one is left behind and all sessions will be at our office.

Given that Maths and Science are application-based subjects students will be assessed throughout the duration of the course to ensure that concepts are fully grasped, and we will have extra sessions on Sundays for students who are struggling with specific topics. Our aim is to ensure that students have a good understanding of the basics and an excellent understanding of the more challenging topics before school is in full swing.

Many students come to us very late. More often than not it is important that we get a headstart so that we alleviate the pressure later on during important exams. Grade 11 and 12 are not just about passing - they are about passing well.

PRICING & PAYMENT

One Subject (Maths or Physics): R1400 once off.

Two Subjects (Maths and Physics): R2500 once off.

Students of the same household get a 30% discount on the total amount.

As finances are tight we have created a payment plan: Half may be paid by 30 December 2022 and the remaining half may be paid by 30 January 2023.

No learner will be allowed to commence with the usual weekly classes if there outstanding summer school fees.

QUERIES
